## PROJECTS

**Intelligent Document Analyzer**

GitHub | Offline PDF AI System

*Tech Stack: Python, Flask, Docker, bge-small, phi-2*

2025

- Developed an offline document analyzer that extracts the most relevant sections based on user role and task.
- Used local embeddings (**bge-small**) and summarization (**phi-2**) to score and return meaningful content.
- Implemented structured heading detection (**TITLE, H1, H2**) using font and layout heuristics.
- Packaged as a Dockerized app for CPU-only execution without internet access.

**Airline Reservation System**

GitHub | Web Application

*Tech Stack: Flask, MySQL, HTML, CSS, Python*

2025

- Designed a web-based ticket booking system with modules for passengers, admins, and crew.
- Implemented flight booking, cancellations, crew assignments, and flight management features.
- Created normalized relational schema and SQL scripts with ER diagrams.
- Delivered a modular, scalable backend with a responsive frontend interface.

## ACHIEVEMENTS & COMPETITIONS
